## WORK EXPERIENCE

### General Electric (GE)

Software Engineer Intern

January 2023 – Present

Rochester, NY

- **Reduced system bottlenecks by 40%** through the implementation of a **microservices** architecture in **Node.js**.
- Transformed legacy interfaces with advanced **React** table components, elevating user experience and supercharging application responsiveness.
- **Accelerated deployment time by 2x** by developing **Python** scripts and optimizing **CI/CD** pipeline processes.
- **Achieved 100% regression** test reliability for MDS TransNET (a long-range wireless communication system) using Robot Framework, maintaining performance in tough scenarios.
- Enhanced project outcomes by actively engaging in **Agile methodologies** and sprint planning sessions.

### Rochester Institute of Technology

Graduate Teaching Assistant

January 2022 – December 2022

Rochester, NY

- **Mentored 200+ students** in **Python**, emphasizing object-oriented concepts and enhancing understanding through targeted code reviews.
- Led lab sessions centered on hands-on exercises, bolstering students' grasp of web technologies like **JavaScript**, **jQuery**, and **AJAX**.

### Quant Binary

Software Engineer Intern

August 2020 – January 2021

Maharashtra, India

- Developed algorithmic trading strategies using **Python** and **C++** for stock trading in the US market.
- Achieved **consistent profitability** delivering an average **monthly return of 5%** over 4 months.
- Architected an automated **Selenium** based testing strategy, **slashing production errors by 50%**.
- Deployed a **FastAPI** based backend, **slashing API response times to under 50ms** and streamlining API endpoint integration.

## ACADEMIC PROJECTS

### Podcast Summarizer | Python, AWS, React.js, Keras

December 2022

- Engineered an AWS-driven solution for podcast summarization using **Keras**, achieving **87% accuracy**, and deployed via **AWS Lambda** with metadata in **DynamoDB**.
- Presented summaries via a **React.js** interface on **AWS S3**, with the infrastructure orchestrated seamlessly using **Terraform**.

### IMDb Data Engineering and Management | MySQL, MongoDB, Apache Spark, Java

May 2022

- Optimized IMDb's **MySQL** database with 21 million rows, **enhancing retrieval speeds by 1.5x**, and streamlined data management using **MongoDB**.
- Leveraged **Apache Spark** to discern key data insights, improving project results by 15%, grounded on a robust **Java** framework.

### Content-Based Image Retrieval | Python, MongoDB, Apache Hadoop, Flask

March 2022

- Crafted an advanced image retrieval platform using **Flask** and **Python**, realizing a **5x jump in retrieval rates** through MongoDB's **NoSQL** framework.
- **Amplified system performance by 15%** by deploying map-reduce on a three-node **Apache Hadoop** cluster.
