WORK EXPERIENCE

General Electric (GE)

Jan 2023 - Dec 2023

Rochester, NY

Software Engineer Co-op

- Reduced system bottlenecks by 40% through the implementation of a microservices architecture in Node.js.
- Transformed legacy interfaces with advanced **React** table components, elevating user experience and supercharging application responsiveness.
- Accelerated deployment time by 2x by developing Python scripts and optimizing CI/CD pipeline processes.
- Achieved 100% regression test reliability for a long-range wireless communication system using Selenium.
- Enhanced project outcomes by actively engaging in **Agile methodologies** and sprint planning sessions.

Rochester Institute of Technology

Jan 2022 - Dec 2022

Rochester, NY

Graduate Teaching Assistant

- Mentored 200+ students in Python, emphasizing object-oriented concepts and enhancing understanding through targeted code reviews.
- Led lab sessions centered on hands-on exercises, bolstering students' grasp of web technologies like JavaScript, jQuery, and AJAX.

Quant Binary Sept 2020 - Jan 2021

Software Engineer Intern Amravati, India

- Developed algorithmic trading strategies using **Python** and **C++** for stock trading in the US market.
- Delivered **consistent profitability** delivering an average **monthly return of 5%** over 4 months.
- Architected an automated Selenium-based testing strategy, slashing production errors by 50%.
- Deployed a FastAPI-based backend, slashing API response times to under 50ms and streamlining API endpoint integration.

ACADEMIC PROJECTS

Podcast Summarizer | Python, AWS, React.js, Keras

Dec 2022

- Engineered an AWS-driven solution for podcast summarization using Keras, achieving 87% accuracy, and deployed via AWS Lambda with metadata in DynamoDB.
- Presented summaries via a **React.js** interface on **AWS S3**, with the infrastructure orchestrated seamlessly using Terraform.

IMDb Data Engineering and Management | MySQL, MongoDB, Apache Spark, Java

May 2022

- Optimized IMDb's MySQL database with 21 million rows, enhancing retrieval speeds by 1.5x, and streamlined data management using MongoDB.
- Leveraged Apache Spark to discern key data insights, improving project results by 15%, grounded on a robust Java framework.

Content-Based Image Retrieval | Python, MongoDB, Apache Hadoop, Flask

Mar 2022

- Developed an advanced image retrieval platform leveraging Flask and Python; achieved a significant 5x improvement in retrieval rates through MongoDB's NoSQL framework.
- Amplified system performance by 15% by deploying map-reduce on a three-node Apache Hadoop cluster.

TECHNICAL SKILLS

Programming Languages Python, Java, C++, JavaScript, SQL

Databases MvSQL, MongoDB, PostgreSQL

Cloud Platform AWS (Terraform, Lambda, S3, API Gateway, DynamoDB, CloudWatch) Web Tools & Frameworks Node.js, React.js, Express.js, REST APIs, Flask, Django, HTML, CSS

Tools & Technologies Git, Docker, Selenium, Linux, Jira, TCP/IP

EDUCATION

Rochester Institute of Technology, New York

Master of Science in Computer Science

Sant Gadge Baba Amravati University, India

Bachelor of Engineering in Computer Science

Aug 2021 - May 2024

GPA: 3.72/4

Jun 2016 - Jun 2020

CGPA: 9.1/10
